Introduction

Dedicated and results-driven MCA graduate specializing in frontend and backend software development. Proficient in crafting responsive user interfaces and robust backend systems using technologies such as HTML, CSS, JavaScript, C#, Python, Java and SQL. Experienced in designing and implementing scalable solutions that enhance user experience and system efficiency. Passionate about staying updated with emerging technologies and delivering high-quality, innovative software solutions.

Internship

Zidio Development

Worked as a Web Developer during internship.

Developed a Task Management application using the MERN stack (MongoDB, Express.js, React.js, Node.js). Focused on implementing task assignment, status tracking, and user role-based access (Admin, Manager, User). Designed a responsive and user-friendly interface. Built for seamless communication between frontend and backend. Ensured proper code versioning and collaboration using Git and GitHub.

Finpro Technologies

Served as an IT Security Analyst Intern.

Worked on the Business Continuity Planning and Disaster Recovery (BCPDR) system using PHP and MySQL.

Contributed to building and managing critical modules including Employee Master, Company Master, Asset Master, System Master, and Corrective & Preventive Action Reporting. Ensured secure data handling through implementation of role-based access, audit logging, and data validation. Helped streamline workflows for vendor management, system-asset mapping, and risk mitigation tracking. Focused on building a reliable system architecture to support organizational resilience and disaster recovery protocols.

Projects

Event Management System

This is a simple application built using ASP.NET and SQL Server that enables users to register, log in and book an organizer, photographer, or travel guide, and select and purchase event products.

Pitshop

Implemented using HTML, CSS, JavaScript & Bootstrap in the frontend PHP in the backend with support of MySQL. It aims to provide the Bikers all the product they need.

FitnessFinds

Implemented using HTML, CSS & JavaScript in the frontend with ASP.NET in the backend with support of SQL Server. It allows users to buy products with strict product catalog & cart and feature to join to the gym.

Other Projects

- Bike Showroom Management System in VB.NET
- Furniture Shop Management System in ASP.NET
- Food Ordering in ASP.NET

Education

Kristu Jayanti College Bengaluru, MCA – CGPA : 8.66	2023 - 2025
Kristu Jayanti College Bengaluru, BCA - CGPA : 8.88	2020 - 2023
East Point Pu College Bengaluru, CEBA – Percentage : 85%	2018 - 2020
Emmanuel Sugunana Jyothi High School, State - Percentage : 75%	2018

Certificates

Robotic Process Automation through PayPal
Aptech certificate In Web Designing, Microsoft Office.
Java Foundation Course By Oracle
ASP.NET Core MVC Course through Infosys SpringBoard
Data Analytics Essentials Course By Cisco
Technology Software Development Job Simulation by Citi
Software Engineering Job Simulation by Hewlett Packard Enterprise
Solution Architecture Job Simulation by AWS

Skills

Programming Languages: Python, Java, C, C++, R, JSP, PHP, Dart, VB.Net, C#

Web Development: HTML, CSS, JavaScript, ASP.NET, ReactJS

Database Management: SQL, MongoDB

Mobile Development: Flutter

Software Proficiency: MS Office Suite (Excel, Word, PowerPoint)

Soft Skills

- Strategic problem solving
- Innovative Mindset
- Agility & Adaptability
- Stakeholder Engagement Relationship Management
